## SUMMARY

Software Engineer at BYDS with a BSc in Computer Science & Engineering. I build and maintain production web and mobile products end to end React/Next.js on the web, Flutter on mobile and I am actively growing into AI-assisted development: shipping faster with modern tooling and keeping codebases maintainable for long-term product work.

## EXPERIENCE

**Software Engineer — BYDS** January 2026 – Present

Website: [www.byds.ai](http://www.byds.ai)

- Contribute to and maintain 3+ live client products, owning features from implementation through ongoing support and iteration.
- Build responsive web applications (React / Next.js) and cross-platform mobile apps (Flutter) aligned with real workflows, reliability, and UX clarity.
- Collaborate with design and product on delivery: scoping, implementation, deployment, and post-launch maintenance.
- Work in an AI & automation-oriented environment integrating AI-assisted coding tools and patterns into everyday engineering workflows.

## SELECTED PROJECTS

### Production / Client Work (BYDS)

**Bilwax** · *Ongoing* · Mobile car wash booking platform

- Develop and maintain a Flutter mobile app for on-demand car wash booking, service selection, and customer–driver coordination.
- Built booking flows, service packages, user authentication, and real-time order management integrated with REST APIs.
- Stack: Flutter, Dart, springboot, REST APIs, Firebase.

**Choto Bill** · *Ongoing* · Nutrition intelligence app

- Contribute to a real-world Flutter application focused on food tracking and nutrition insights.
- Implemented core mobile features including user flows, data handling, and API integration for production use.
- Stack: Flutter, Dart, REST APIs.

**GradMate** · *Ongoing* · AI-powered graduate school guidance platform

- Maintain and extend web features for gradmate.ai an AI-driven platform helping students with applications, test prep, and university research.
- Build and improve responsive UI, user-facing workflows, and integrations supporting AI-powered tools.
- Stack: React, Next.js, TypeScript, REST APIs.

### Earlier Projects

- Job Portal — React, Tailwind, DaisyUI, MongoDB, Firebase (auth + full-stack flows)
- Sip & Savor — React, Tailwind, MongoDB, Firebase
- Somokounik — Civil engineering firm website (React, Tailwind, DaisyUI, Email.js) — live client site
- Portfolio — Next.js, TailwindCSS (nazmul-hasan-portfolio.vercel.app)

## TECHNICAL SKILLS

**Mobile:** Flutter, Dart

**Frontend:** JavaScript, TypeScript, React, Next.js, Redux, React Query, Tailwind, Ant Design, Material UI, HTML5, CSS3

**Backend & Data:** Node.js, Express, Springboot, REST APIs, Socket.io, MongoDB, MySQL, Firebase, PostgreSQL, Prisma

**AI-ready practices:** AI-assisted coding & debugging (Cursor / Copilot), prompt-driven feature scaffolding, interest in LLM APIs / RAG / automation workflows

**Tools:** Git / GitHub, VS Code, Jira, Trello, Vercel, Netlify

**Languages:** English, Bengali

## EDUCATION

### BSc in Computer Science and Engineering

Dhaka University Technology Unit, MEC · Session 2019–20 · Graduated June 2025

Higher Secondary Certificate — Dhaka College, Dhaka (2019)

Secondary — Government Laboratory High School (2017)

## LEADERSHIP & EXTRA

- Former President — MEC Photography Club
- Organizing Secretary — MEC Computer Club
- Founder — Paperman (handmade notebook business)
